PROFESSIONAL SUMMARY

M.S. Computer Software Engineering student at ASU (GPA 4.0, Dec 2026) who shipped barcode scanning to 5 ASU stores (React Native, C#/.NET, SQL Server) and a FastAPI BOM platform with a Gemini RAG assistant at Cartken.

SKILLS

Languages: Python, Java, TypeScript, JavaScript, C++, C#, SQL, HTML5, CSS3
AI/ML: PyTorch, TensorFlow, scikit-learn, XGBoost, LightGBM, LangGraph, LangChain, RAG, function-calling
Backend and Frontend: FastAPI, Node.js, Express.js, REST APIs, OAuth 2.0, JWT, React, React Native, Tailwind CSS
Data: PostgreSQL, MySQL, SQL Server, SQLite, Firebase, pgvector, Pandas, Label Studio
Cloud and Testing: AWS, Google Cloud Run, Azure Pipelines, Docker, GitHub Actions, GitLab CI, Linux, Git, pytest, Vitest

WORK EXPERIENCE

Aramark **August 2026 - Present**
Student IT Associate, Application Developer (Part-Time) *Tempe, Arizona*

- Cut inventory counting time 32% (335 to 227 hours) across 5 ASU stores with barcode scanning in a React Native app.
- Raised scannable item coverage from 45% to 83.1% by merging POS, vendor and invoice data into one barcode dataset.
- Enabled scanning with zero app or schema changes by indexing barcodes in the C# (.NET) REST API; rollback = redeploy.
- Added camera and hardware barcode scanning, voice search and Python/SQL check-digit validation to block wrong-item scans.
- Wrote read-only T-SQL queries against a SQL Server database of 800K+ vendor products and 3M+ inventory records.

Cartken **June 2026 - August 2026**
Software Engineering Intern *Tempe, Arizona / Remote*

- Built CARTI, a Gemini RAG assistant with cited answers on live BOM data (~350 ms); prices never LLM-generated.
- Replaced spreadsheet BOM tracking for 20+ PCB designs with a 27-endpoint FastAPI API used daily by a 5-person team.
- Merged 2,000 BOM line items into 419 unique parts and made every edit reversible with a field-level audit trail and restore.
- Removed manual BOM uploads via GitLab CI sync on every commit; added FIFO stock checks that catch part shortages.

Cere Labs Pvt. Ltd. **Feb 2023 - Apr 2023**
Software Development Intern *Mumbai, India*

- Raised ML-annotation throughput ~58% across 10,000+ image/PDF assets by eliminating duplicate preprocessing.

PROJECTS

Nexus AI: Multi-Tenant RAG Knowledge Agent

- Built multi-tenant LangGraph RAG over Notion/Slack/Drive: pgvector+BM25 retrieval, MMR reranking, AES-256, Cloud Run.

Phishing URL Detection System

- Built a stacked ensemble classifier on 88,000+ records (~97% acc, 96.7% recall, 95.3% precision), thresholds set via PR curves.

TestPilot: AI Engineering Platform

- Built a FastAPI/Qwen service that retrieves coding standards with pgvector to generate pytest, Jest and JUnit tests.

EDUCATION

M.S. Computer Software Engineering (Concentration in Data Science) **Jan 2025 - Dec 2026 | GPA 4.0**
Arizona State University

B.E. in Information Technology (Honors in Artificial Intelligence and Machine Learning) **Jan 2021 - Jul 2024 | GPA 3.46**
Don Bosco Institute of Technology

CERTIFICATIONS

- Microsoft Certified: Azure AI Apps and Agents Developer Associate (AI-103)
- Microsoft Certified: Azure AI Cloud Developer Associate (AI-200)
