EXPERIENCE

Software Development Intern, Cere Labs Pvt. Ltd., Mumbai, India

February 2023 - April 2023

- Improved throughput approximately 58% on a production ML data annotation platform processing 10,000+ assets by redesigning backend modules with object-oriented architecture.
- Resolved 8 production issues by tracing root causes through log analysis, while contributing to code reviews and QA checks in an agile SDLC.

Software Development Intern, Jio Platforms Limited, Mumbai, India

October 2022 - December 2022

- Built a distributed validation system in Python and SQL that improved data integrity by 93% across 1,000,000+ MySQL records by rewriting validation logic for real-world edge cases.
- Cut manual review effort by 78% by automating validation checks and reduced query latency by 37% through targeted indexing optimizations.

PROJECTS

Nexus AI: Multi-Tenant RAG Knowledge Agent

June 2026

Python, FastAPI, LangGraph, LangChain, PostgreSQL/pgvector, React

- Built an agentic RAG pipeline (FastAPI, LangGraph, LangChain) that connects Notion, Slack, and Google Drive via OAuth 2.0 and classifies query ambiguity to branch between clarification and retrieval.
- Implemented hybrid semantic and BM25 retrieval with MMR reranking, per-document permission checks, and AES-256 encrypted credentials, enforcing multi-tenant isolation and zero-content logging across company-scoped data.

TestPilot: AI Test Generation and Defect Prediction

March 2026

Python, scikit-learn, Docker, pytest, React (graduate team project)

- Built a defect prediction module using a scikit-learn Random Forest model on change history and complexity metrics (PyDriller, Radon) to score per-file risk with a color-blind-safe heatmap.
- Automated CI/CD deployments to Vercel and Google Cloud Run via a bundled Docker image and wrote pytest/Vitest test suites as part of a 3-person team.

Phishing Detection and Classification System

September 2025

Python, multithreading, scikit-learn

- Engineered structural and behavioral URL features to reach approximately 99% accuracy across 88,416 records after iterating through multiple feature combinations.
- Reduced per-record processing time from 450ms to 127ms by parallelizing feature extraction with multithreading.

EDUCATION

Arizona State University, Tempe, AZ

January 2025 - December 2026

M.S. in Computer Software Engineering, GPA: 4.0/4.0

- Coursework: Data Mining, Data Processing at Scale, Software Testing, AI for SE, DS for SE.
- Graduate Grader for Data Structures and Algorithms, evaluating code correctness for 30 students.

Don Bosco Institute of Technology, Mumbai, India

January 2021 - May 2024

B.E. in Information Technology, GPA: 3.46/4.0

TECHNICAL SKILLS

Languages: Python, Java, C++, C#, TypeScript/JavaScript, SQL, HTML5, CSS3

AI/ML: scikit-learn, LangGraph, LangChain, RAG, sentence-transformers, feature engineering

Backend: FastAPI, Node.js, Express.js, REST APIs, OAuth 2.0, JWT

Databases: PostgreSQL, pgvector, MySQL, MongoDB

DevOps/Cloud: Git, CI/CD, Docker, Linux, Vercel, Render, Google Cloud Run, AWS (familiar: EC2, S3, Lambda)

LEADERSHIP

- Deputy Head, Training and Placement Cell, Don Bosco Institute of Technology.
- Chairperson, AI Club, Don Bosco Institute of Technology.
